

**PAINT(H)INGS**  
**PATRIC SANDRI**

5 May - 3 June 2017

Preview: 4 May 2017, 7pm

The exhibition „PAINT(H)INGS“ features new works of Patric Sandri (\*1979 Uster, CH) including compositions with lines, colors and mathematical concepts.

Sandri questions the role and function of the painting and extends it into a three-dimensionality by using the stretcher frame.

The construction of the individual stretcher frames is based on a mathematical concept of interlacing and overlapping, followed by the application of color.

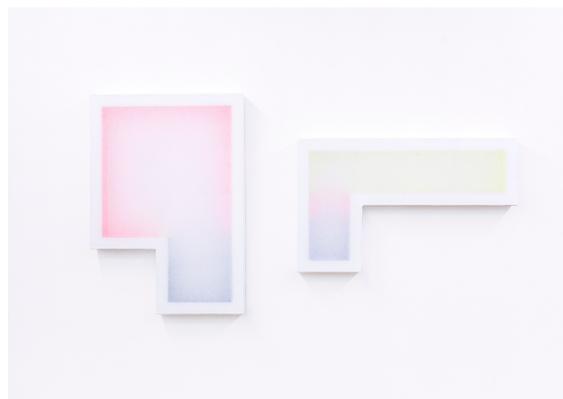

The conditions of painting are revealed, the primary colors applied on the wood-constructions mix with each-other, shimmer, reflect and radiate through transparent fabrics onto their background, giving the artist's works a sculptural character.

Patric Sandri manages to develop non-figurative pictorial objects in a unique way, revealing their meaning through the act of observation.

*“Space, light, perspective and the imaging of light through color” that is, so Sandri “simply said, the focus of my work. I am interested in calling into question the basic elements of painting. Thus I use light and color not in terms of illusionistic painting, but as incorporated elements of the artwork”.*

Recent solo exhibitions include „Between Numbers and Poems“ at Annarumma Gallery, Naples (IT), 2016, „Eight Canvas - One Painting“ at BALTSprojects, Zurich (CH), 2016 and "Interspaces" at Ki-osk Tabak, Zurich (CH), 2016.

His works were shortly shown in following group exhibitions: “Micro Salon#7”, gallery l'inlassable, Paris (FR), 2017, “Song No1”, No. Stereo Contemporary, Cascais (PT) as well as in “Iconic”, Federico Rui Arte Contemporanea, Milano (IT).
